

# Quick Top Pro Setup Instructions

Copyright Shade Australia Pty Ltd 2010. Exercise safe work procedures at all times.

## Setting up your Quick Top Pro for the first time...

1. Carefully open the box taking care not to cut downwards toward fabric.

2. Remove frame and open about 1/3 of the way.

3. Open box containing roof.

4. Unfold the canopy.

5. Loosely spread the canopy over the frame.

6. Two people grasp one side each and walk backwards fully extending frame.

7. Secure velcro tabs in each corner.

8. Secure drawstring(s) on top hat(s). **Continue onto step 4**

## Setting up your Quick Top Pro...

1. Carry the entire unit in its bag to the setup area.

2. Remove frame with the canopy attached.

3. Two people grasp the frame on either side and walk backwards.

4. Lock top pins into place at each corner leg

5. Two people grasp one leg each and holding the bottom pin, lift the frame.

6. As each person lifts, gently pull the bottom pin. The internal leg will drop out.

7. Release the pin at the required height, 5 holes is standard height.

8. Ensure each leg is locked into position.

## Setup Instructions Continued...

Copyright Shade Australia Pty Ltd 2010. Exercise safe work procedures at all times.

9. Work around the entire frame locking each leg into position.

10. Secure internal velcro tabs to keep canopy taut over the frame.

11. Secure with pegs and guy-ropes if it is windy.

12. Fit walls if required. Internal velcro first.

13. Secure walls to legs with velcro straps.

14. Multiple sidewalls can be zipped together at corners.

### Packing up your Quick Top Pro...

1. Release the pins on each leg

2. Release the pins on each corner. Release the internal velcro tabs.

3. Grasp the frame and walk toward each other.

4. Fit the frame into the bag. Canopy can be left on.

5. Completely fit frame into bag and zip up bag.

**NOTE: Take care not to let the frame come in contact with live electrical components which could result in electric shock. Never erect the Quick Top Canopy or leave the Quick Top Canopy erected in strong wind. These shelters are not wind rated. Keep the Quick Top Canopy well clear of flames or heat so as not to damage the canopy.**
