Fairlight

Premium Aluminum Umbrella

'Collar tilt' enables tilting of the umbrella to 20° by simply rotating the collar on the winder housing. This can be done whilst sitting down.

Easy opening and closing crank winder

Open

Close

Safety:
It is vital that the umbrella be lowered when unattended or in windy conditions.
Excessive winds can put great stress on the umbrella frame, which can cause damage to the umbrella and danger to people.
This umbrella is not recommended for use in exposed environments, such as high balconies or roof tops.
Please carefully follow these and the care instructions (located on the swing tag) when installing and storing.

If in doubt about how to install this item, consult a qualified trades-person.

Umbrella base

An umbrella base will need to be installed while using this umbrella.
Shelta Australia recommends concrete or granite bases - -
Small-270cm umbrella
Medium-330cm umbrella.
