

SHADE AUSTRALIA SOLARMAX™ SHADE STRUCTURES

DIY permanent shade structures for carports and outdoor shade. 95% shade protection, engineer certified, easy installation. Professional shade at a DIY price.

What Are Shade Structures?

Shade Structures are a light-weight frame with a fabric roof. A Solarmax is a modular structure designed to fit together easily and withstand all Australian weather.

Our modular structures come in sizes up to 5x7 metres. Any bigger and a crane is required for installation. This makes them perfect to go over DIY car-ports, smaller play areas, pools and any place where permanent shade protection is needed.

What is Included?

SolarMax Shade Structures come delivered as a kit ready for installation. If you are bolting the posts to an existing concrete slab, you will receive footplates and if you are securing the posts going into the ground, the vertical posts will be extended by 750mm.

Every kit includes a heavy-duty shade canopy fitted with a stainless steel cable, corner brackets, tensioning bolts, and the nuts and bolts required to assemble the structure. Footplates are also included for bolt-down jobs.

Typically, we ship all the components to you EXCLUDING the steel pipes. This is because they are expensive to ship and readily available at any local steel supplier. We can liaise with your local steel supplier to get the pipes cut to length. The typical cost of the steel pipes is around \$600. We manufacture each shade-canopy to order here in Sydney, so allow 2-3 weeks for delivery.

The Materials

The Shadecloth

Solarmax Shade Structures are made using **Rainbow Z-16 Commercial Grade Shade Cloth**. It is a 200 GSM commercial shade cloth and offers up to 99% UV-R Protection. Currently, it is not available in waterproof canopies.

The Pipe

Shade Structures are designed to be made with **50NB light pipe**. This pipe gives the structure a W33 wind rating (approx. 118km/h)

Sizes & Colours

Solarmax Shade Structures are available in **9 standard sizes** from 3x3m up to 5x7m. They are available in **24 colours** and can be installed via bolt-down plates or inground installation

Warranty

Solarmax Shade Structures come with a **5-Year workmanship warranty** on the frame and fabric and **10-Year UV degradation warranty** on the fabric.
